ABOUT MORN INDIA TECHNOLOGIES

Established in the year 2009, Morn India Technologies, an ISO 9001:2008 firm, we are manufacturer, supplier and trader of optimum quality CNC cutting and engraving machine. Under this range, we facilitate clients with auto tool centre, wood working CNC router and multi workstage CNC router. Our offered range of products has ISO standard and CE certificate. To manufacture our range, we have imported various electrical and mechanical parts from the Italy, German and Taiwan. The products, we offer are widely known for their efficient performance, longer service life, sturdy construction and minimum power consumption. Our machines are most commonly used in the plastic, acrylic, furniture and foam industries.

We have a team of experienced professionals, which helps us in offering unmatched quality products to the clients. Our professionals work in close contact with each other to maintain harmonious atmosphere in the premises. Well-versed in this domain, all our professionals are highly experienced and qualified.

Services

We, at Morn India Technologies, rely on a well thought out quality control programme devised by experienced quality controllers. As a responsible business unit, we abide by all the industrial norms established for the manufacturers for the production of Spark Erosion Machine and Electric Discharge Machine (EDM), Machine Tools & Accessories and other machinery. Quality being an indispensable aspect of our organization, we try to maintain it at every stage of production - right from the procurement of materials required for production to the final dispatch of the finished products.

The quality control programme entails various tests at different stages of production. The tests are carried out under the supervision of quality controllers in our in-house facility, which is equipped with requisite testing devices and instruments.

Customer Satisfaction

Since our inception, our organization is aimed towards serving our clients with a quality-approved and a flawless range of products and thus pay utmost importance to the quality aspect of the product offered by us. All the products offered by us are manufactured using quality-approved raw-material sourced from the authorized vendors of the industry. Our quality professionals team ensures that all the raw material procured by us are quality-approved by examining them varied quality parameters set by the industry. Besides this, our entire range is manufactured under the supervision of our experienced team of professionals, in strict adherence with the industry set quality standards. Furthermore, before the products are allowed to packed for their final disposal in the market, each product is stringently examined at our in-house quality testing unit.

Following are some of the quality parameters on the basis of which our products are thoroughly examined by our quality controllers team:

- ▶ Finish
- ▶ Dimensional stability
- ▶ Durability
- ▶ Hassle-free performance
- ▶ Corrosion Resistance
